C-Breeze

Looking for a fresh breeze for your cruising sail wardrobe? Dimension-Polyant's C-Breeze could just be your perfect mate. As proud members of our woven polyester family, their constructions are low aspect. Which means that warp and fill fibers are not highly unbalanced. The latest generation of C-Breeze products mark a big step into the future as its tighter weave results in better bias stability. Both, warp and fill fibers are high tenacity. The good tensile strength directly relates to the overall strength of the yarn and its resistance ability under load, resulting in a better shape retention over the life of the sail as permanent stretch is reduced. C-Breeze is only available in our MT finish, which is part of our range since many years.
